

Health Savings Accounts

A Health Savings Account (HSA) is used to pay, on a tax-free basis, qualified medical expenses for the accountholder and their family who have a High Deductible Health Plan (HDHP). HSAs can provide significant tax benefits to eligible individuals relating to paying qualified medical expenses, and benefits similar to many tax-favored retirement plans. Your WaterStone Bank HSA will be available to help pay for the expenses your HDHP does not cover.

WaterStone HSAs include:

- Convenient access with your CheckCard or checks
- Competitive rates for enhanced savings potential
- Easy automatic transfers so the money is available when you need it
